

# ThreatBlockr Release Notes

## ThreatBlockr Build 139 – July 26, 2023

### MSP Features:

#### Subscription Export

The subscription data contained in the MSP Dashboard can now be exported to CSV or JSON. To export this data:

- Navigate to the MSP Dashboard
- On either the Companies or Edge Instances tab, click on the ellipsis menu in the header row
- Select the desired file type (CSV or JSON)
- The file will download to your local machine

The screenshot shows the MSP Dashboard interface. At the top, there are four summary cards: Companies (100% Fully Subscribed), Subscriptions (98% Applied), Throughput Usage (14% Applied), and Edge Instances (100% Fully Subscribed). Below these is a navigation bar with 'COMPANIES' and 'EDGE INSTANCES' tabs. The 'COMPANIES' tab is active, displaying a table with columns: NAME, IDENTIFIER, SUBSCRIPTIONS, EDGE INSTANCES, BANDWIDTH, THROUGHPUT, FULLY SUB, and an ellipsis menu. The table lists four tenant companies. The ellipsis menu for the first row is open, showing 'Export CSV...' and 'Export JSON...' options.

NAME	IDENTIFIER	SUBSCRIPTIONS	EDGE INSTANCES	BANDWIDTH	THROUGHPUT	FULLY SUB	Export CSV...	Export JSON...
Tenant Company A	Subscription End 12.31.24	45 applied	APAC Edge: 65.46 Mbps +2	3.25 Gbps	344.64 Mbps	100%		
Tenant Company B	Accounting ID 1029384756 8	30 applied	Company HQ: 221.9 Mbps +2	4.3 Gbps	660.08 Mbps	100%		
Tenant Company C	Autorenewal on 12.31.23	26 applied	Edge 1 +1	2 Gbps	288.59 Mbps	100%		
Tenant Company D	Onboarded 6.1.23	20 applied	North America HQ Edge: 95.47 Mbps	200 Mbps	95.47 Mbps	100%		

The CSV export will include:

- Tenant company rows with the following columns:
  - Identifier
  - Count of each subscription type provisioned to the company
- Edge instance rows:
  - Company name the instance is assigned to
  - Count of subscriptions provisioned to the Edge instance
  - Total subscription bandwidth provisioned to the Edge instance

The JSON export will include:

- Subscriptions
  - Details on each subscription type available to provision to companies
  - The Count displayed is the count of subscriptions that are not provisioned to a company or Edge instance
- Companies
  - Subscriptions
    - Details on each subscription type provisioned to the company
    - The Count displayed is the count of subscriptions unused by the company
  - Edge Instances
    - Name & Location (if provided) of the Edge instance
    - Details on the subscription(s) provisioned to the Edge instance
      - The Count displayed is the count of what is provisioned to the Edge instance
      - The Parent Count displayed is the count of the subscription type unused by the company
