Bandura Cyber GMC Release Notes

This document provides release notes for the Bandura Cyber Global Management Center (GMC).

The complete GMC User Manual can be retrieved from the Bandura Cyber Support Center, located here: https://helpdesk.banduracyber.com/hc/en-us.

RELEASE NOTES

**Release:** GMC Build 13

Release Date: 23 September 2020

Purpose of the Release

This release provides a mix of new features, enhancements, and bug fixes.
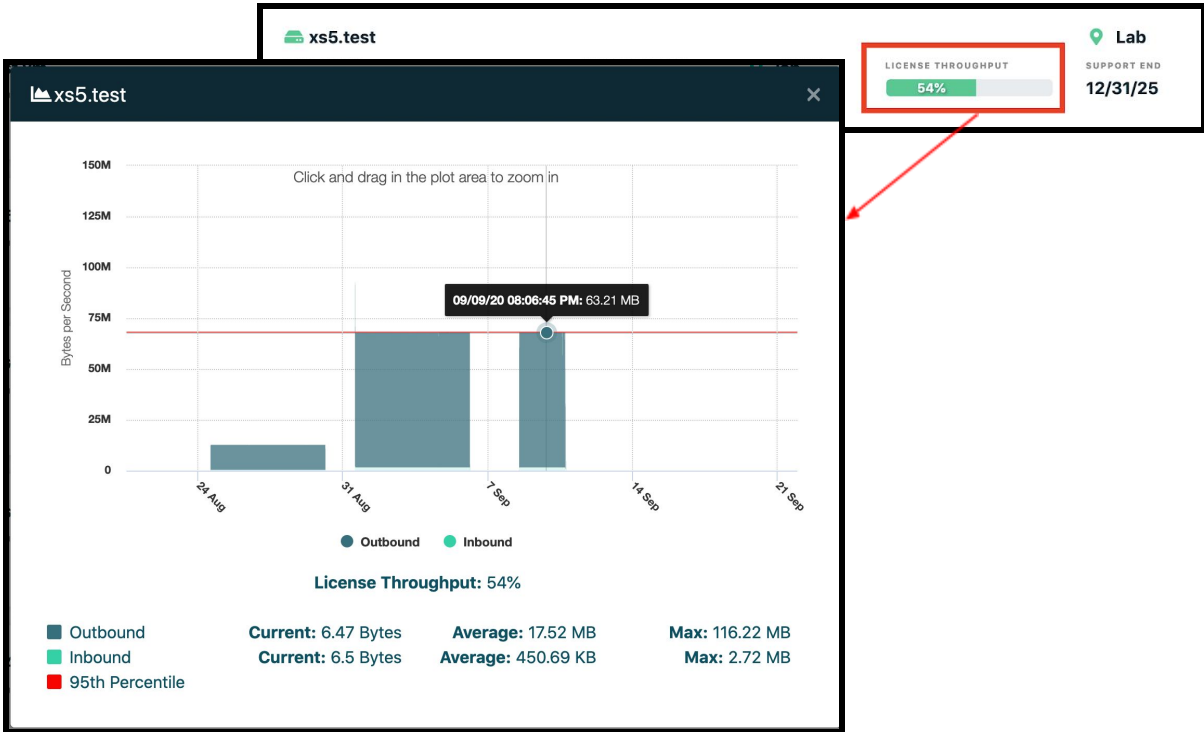

New Features & Enhancements

The following new features have been added to the Assets page, which is available via "Assets" in the left-hand navigation:

1. **Filtering-** Filtering of assets is now available via the Asset Filters button, located on the top-right corner of the Assets page. Based on the selections made, the screen will filter down to the applicable asset(s). As selections are made, the remaining filter categories will update with the options that remain and the Assets screen is automatically updated to display the applicable assets.
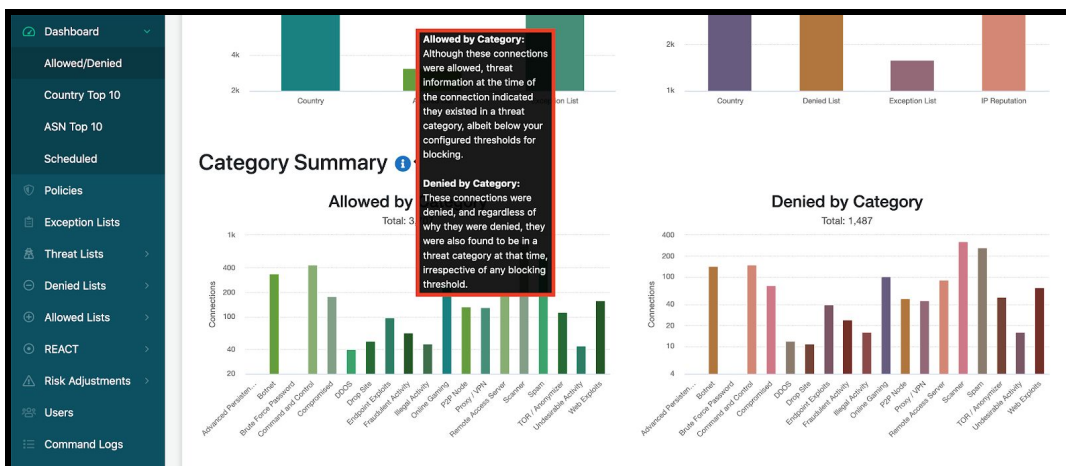

2. **License Throughput Chart-** Users can now view the past 30 days of an asset's inbound and outbound throughput (in bytes per second) by selecting the License Throughput meter on an individual asset's card. As a user scrolls over the graph, a tooltip will display the value for that particular day and time.

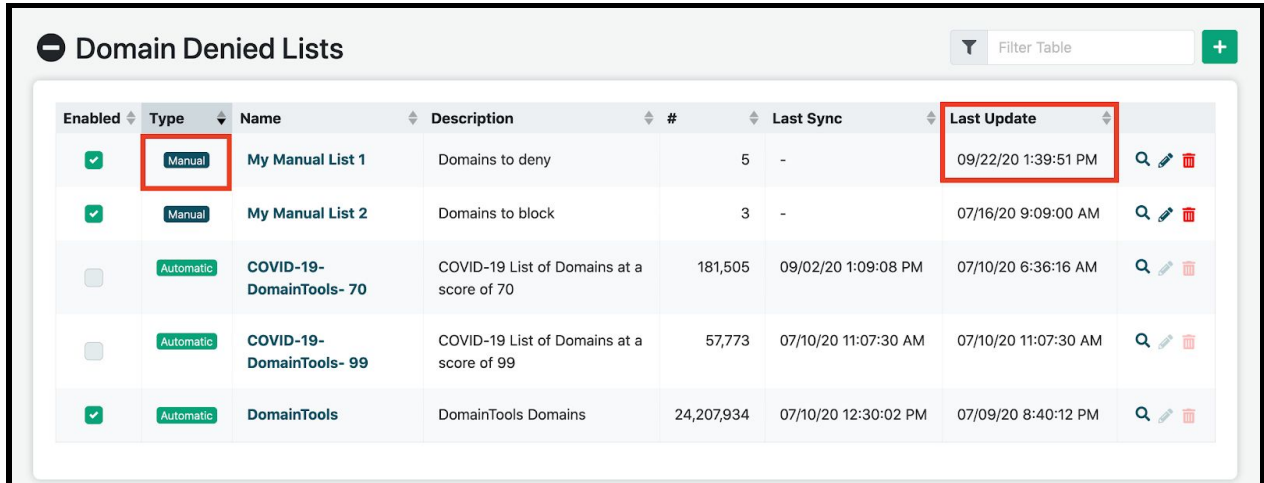

The following enhancement has been made to the GMC Dashboard:

1. **Category Summary Graphs-** A tooltip has been added to this section to provide better context on what these graphs are displaying.

Bug Fixes

1. **Last Update Date for Manual Source Lists-** When the content of a manual source list was updated, the Last Update date in the source table was not updating. This issue has now been fixed and applies to the following source tables: Threat Lists, IPv4 Denied, Domain Denied, IPv4 Allowed, Domain Allowed.

Domain Denied Lists

Enabled	Type	Name	Description	#	Last Sync	Last Update	
☑	Manual	My Manual List 1	Domains to deny	5	-	09/22/20 1:39:51 PM	🔍 ✏ 🗑
