

Bandura Cyber GMC Release Notes

This document provides release notes for the Bandura Cyber Global Management Center (GMC).

The complete GMC User Manual can be retrieved from the Bandura Cyber Support Center, located here: <https://helpdesk.banduracyber.com/hc/en-us>.

RELEASE NOTES

Release: GMC Build 22 on 18 November 2020

New Features

The following Allowed List plugins are now available:

- DocuSign IPv4
- DocuSign Domain
- MailChimp IPv4

For customers using DocuSign's eSignature service, you can ensure traffic is not blocked by using the new DocuSign Allowed List plugins to create an IPv4 and Domain Allowed list. Similarly, for customers who use services provided by MailChimp, creating an IPv4 Allowed List using the new plugin will ensure your ThreatBlockr allows this traffic unabated.

These plugins do not require any additional configuration and are available via the Create button in the top-right corner of the Allowed Lists - IPv4 and Allowed Lists - Domain screens.
