Bandura Cyber GMC Release Notes

This document provides release notes for the Bandura Cyber Global Management Center (GMC).

The complete GMC User Manual can be retrieved from the Bandura Cyber Support Center, located here: <u>https://helpdesk.banduracyber.com/hc/en-us</u>.

RELEASE NOTES

Release: GMC Build 49 on April 7, 2021

Enhancements:

Indicator of Compromise Domain Search:

Users now have the ability to search a Domain address, in addition to the existing IP address search, and see if it is a malicious actor! To perform a search, simply select the spyglass icon in the top right corner of the screen, enter an IP or Domain address, and select the search icon in the modal.

			Q 0 / 8 ×
Last 30 r 🗢 🚺 All Polici: 🕈	All Asset: +		🗄 Schedule
Reason Summary			
Allowed by Reason Total Allowed Connections: 0		Denied by Reason Total Denied Connections: 0	
Q IPv4 / Domain Indicator Search 0	00travel.fun	×	
IPv4 Address or Domain 000travel.fun		٩	

The results that display will provide general information on the IP or Domain address and will indicate if it is included in any of our Bandura Threat or Denied feeds.

Q IPv4 / Domain Indicator Search 000travel.fun				
IPv4 Address or Domain				
000travel.fun			Q	
General Info				
Address	Country Name	De	nied List

Software Downloads

For customers that are downloading ThreatBlockr software in GMC via the Software screen, we have made an improvement to how these downloads are handled. After selecting the Download Software button, the package will take several seconds to compile and then you will see the progress of the download in your browser. When using Chrome the download will display at the bottom of the browser:

Dashboard	>	Software ThreatBloc	kr		Filter Table

Bug Fix:

Device Tag Names Not Updating

When a list name was changed in GMC, the associated tag name on the device logs was not being updated. This is now resolved.
